Race Summary. Light air sailing was the challenge today with winds from the east at 4 to 8 knots, backing to the north east. The start line was set near buoy Q56 with the upwind turning point buoy Q64, for a course length of 0.3 NM. Race #1 was run twice for a total course length of 1.2 NM. Race #2 and #3 rounded the mark only once for a course distance of 0.6 NM. By the time of race #4, wind had shifted to the northeast and decreased, so the course was changed to round mark QM3, a distance of 0.2 NM. The mark was rounded twice for a total course distance of 0.8 NM. The start line was fairly short, but all racers managed to pick their spots and start pretty much in unison. However, on the last race, one sailor did cross the start line early and had to return and re-start the race. In typical late day racing, winds slowly decreased during the last race, which is reflected in the larger intervals between finish times. At 4 PM, after four races and two hours on the water, sailors returned to BQYC.

Only Lasers raced today because the OPTI sailors were at CORK in Kingston.
